

Effective Soundbar Demonstrations

- Keeps soundbars awake and ready to demo
- Master volume control
- Customizable demo timeout (30S for default)

The MP10 provides a perfect demonstration solution while driving immersive 1080P video and Digital audio for a loss-free high-quality soundbar demonstration kiosk.

The MP10 will auto play demo video files from the root of SD card or USB drive in a loop. The audio is sent to demo TV at default. The user can press one of the eight push button selectors to start demo mode: the sound is toggled into the corresponding soundbar for 30 seconds.

Easy TV Sound Demo

The toggled sound from TV speakers to a dedicated soundbar will return to TV speakers after the 30 seconds, and re-toggled into soundbar until next press, users can adjust the volume via volume up, down and mute buttons.

KEY FEATURES:

- Demonstrates up to eight soundbars
- Keep-awake prevents soundbars from entering sleep mode
- Durable buttons for volume and product selection
- Supports audio source Dolby /AC3 high bitrate files
- Supports soundbars with Dobby decoder
- TV demo mode toggles each position between TV sound and soundbar - visit website for details

Easy to use, durable controls invite customer interaction. Master volume control features are compatible with up / down buttons.

Soundbar Demonstrator Demo With Eight Push Button Selector

This system configuration switches up to eight soundbars using one audio source. Customers simply press the button next to each soundbar and adjust master volume using a up and down buttons.
