Contactless Access Control Tablet User Guide

Version:V1.0

Date:2020.08.08

Smart Access Control Facial Recognition

1.Application Scenarios

Ideally used for access control in office, hotel, school, shopping mall, community which requireaccess check, time attendance, person-document check, person-facial ID check.

2. Main Features

- 1 2.0MP HD camera
- Support 3-color lighting supplement
- Support NFC card reader
- Support RS485, Relay, GPIO, gate magnetic I/O.
- Support Wan/Lan Implementation
- Optional with multi-touch screen
- 1 Optional with 4G LTE
- Optional with dual-lens camera and thermal imaging sensor
- Optional with TOF sensor
- Optional with ID/passport reader, fingerprint scanner, light shield, 86mm type box.

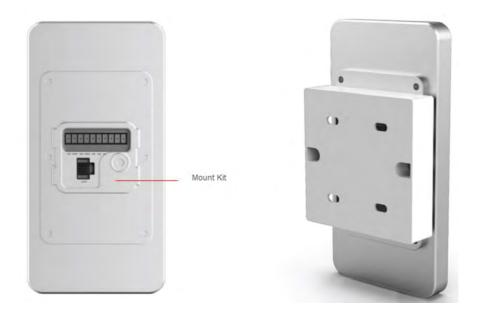

3. Specification

	Contactless Access Control Tablet				
Model No.		Droid5010AC			
LCD Panel Size		TFT 5-inch			
	Resolution	854*480			
Camera	Pixels	2.0 MP (Optional Dual-lens 2M+1.3M)			
	os	Android 8.1.0 Dedicated OS for access control			
	Processor	Rockchip RK PX30 Quad-core Cortex-A35 up to 1.5GHz			
	Storage	1G DDR+8G EMMC Optional: 4G DDR+16G/32G/64G EMMC			
	Power Supply	DC 12V/3A(POE Optional,ernally plugged)			
Spec	Consumption	9.8W Max			
	Humidity	0%-90% (non-condense)			
	Work Temp	-10°C ∼ 55°C			
	Storage Temp	-20°C ∼ 70°C			
	IP ratings	IP65			
	Usage Condition	indoor or outdoor with light shield			
	Dimension	86mm*170mm*15mm			
Hardware Identification		By Human Facial ID			
		RJ45 LAN*1			
		Micro-USB OTG*1			
		DC In *1			

	Ports	RS485*1
		Relay*1
		ALM Door On/Off *1
	Reset	Reset to factory default (located on the back of the product)
	Restart	Optional (IP ratings will be compromised with it)
	Light Supplement	Support 3-color supplement
Off-wall detecting		Supported (with hall sensor)
Watch-dog		Supported
Light sensor 4G LTE Motion sensor Tele-talk Speaker		Supported
		4G Worldwide bands optional (project only)
		TOF Optional
		Optional MiC
		2W*1
	WIFI	Optional: 2.4G IEEE 802.11b/g/n
Networking	Bluetooth	Optional: Bluetooth 2.1/3.0/4.0/4.2
	Communication	4G Worldwide bands optional (project only)
Packing	Packing Unit Weight 0.8Kg	
Dimension 100mm		100mm*200mm*30mm

4. Device Close-Lookup Features

Wall Mount

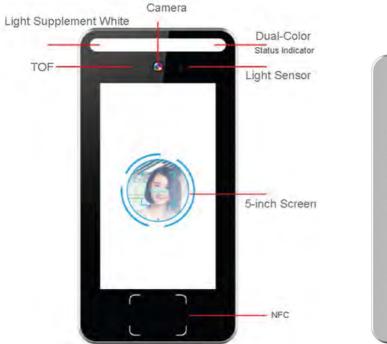

5. Product Dimension

6. Appearance and wiring guide

1. Product Appearance

2. Expansion Socket 10-pin

12V	12V Positive	
GND	Data Earth	
NO	Door Lock Constant On	
СОМ	Door Lock Public Nod	
NC	Door Lock Constant Off	
ALM	On/Off Button	
GND	Data Earth	
RS 485A	RS 485A	
RS485B	RS485B	
GND	Data Earth	

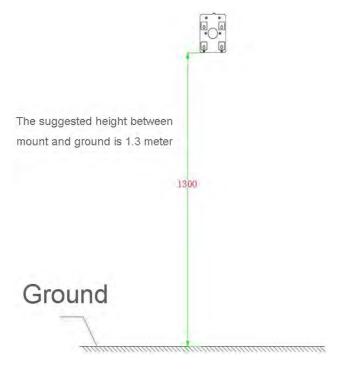

Notes:

- 1.Relay is to control the On/Off switch of the door lock, it can supply power as well.
- 2.RS485 port could talk to external RS485 of the door lock.
- 4.ALM is an optional port, for either input or output connection, it could be disconnected without Affecting the normal operation.

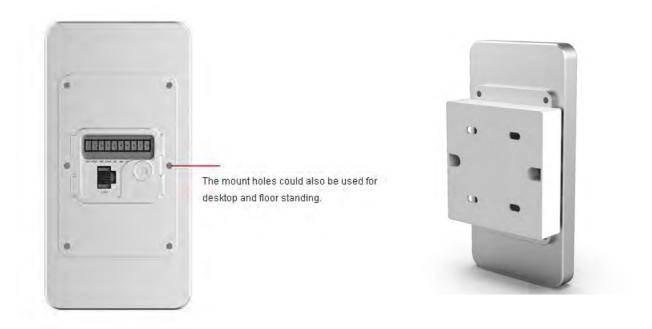

7. Installation

As shown below

Notes: If the device is shipped with 86mm type box, there will be a full set of Screws supplied for installation use.

Mount kit and installation

Note: Use one pc of M3 screw to fix the device (supplied in the package).

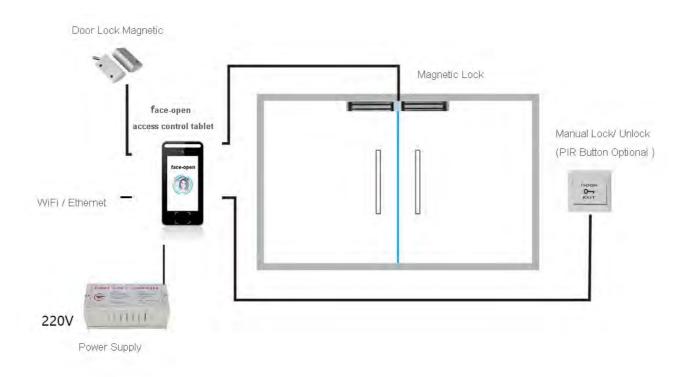

8. Package content and guide

(1)materials /tools list

No.	materials /tools	Qty	Remarks
			accessories: 12V AC adapter, screws,
1	Console & Accessories	1	wall mount, warranty card, content list
			etc
2	Door Lock Switch (Optional)	1	Manually Unlock the door
3	Magnetic Lock (Optional)	1	Power cut off to open, Power connect to lock
4	Magnetic Lock Power (Optional)	1	Supply power to magnetic lock and facial Recognition tablet
5	Ethernet Cable (Optional)	N/A	For ethernet calbe and other wiring
6	Net cable maker, networking detector	N/A	For ethernet calbe and other wiring
	And other tools (optional)		
7	Wall Drill (Optional)	N/A	For wiring use

(2) wiring guide with gate magnetic

1. working with gate magnetic;

9. Safety instructions

- 1. Wiring must be safe and reliable to avoid power accidents;
- 2. If the DC power cable is not the special cable specified, it may supply power lower than rated;e.g 11V(less than rated 12V), there will be repeated restarting or screen freezing.
- 3. Anti-tampering with other device.

Make sure the tablet is at least 30cm away from other applicance and power source.

- 4. The in-built relay and the magnetic lock's accepted power voltage/current is 12V/3A maximum, If it is above this level, it will be damaged and door could not be opened.
- 5. The AC adapter's cable is 1.8 meter long.

Extension power cable could not be longer than 3 meter.

- Do not use other non-rated AC power adapter like 9V or 12V 1A;
- Use quality cables

Make sure DC in voltage > 11V

Notes: If supplying power via ethernet cable, make 4 leads positive, and other 4 negative.
