

Speaker Power Amplifier

Features

- Up to Dual Channel Output at 4Ωx 50Watts
- Compact design with easy installation
- Works in Mono or Stereo
- Adjustable power output for wide range of speaker powers
- Extra features available via customization
- Firmware update via USB

Product Picture & I/O

Tech Spec

Dynamic Range: $\geq 100\text{dB}$
S/N (RCA): $\geq 100\text{dB}$
Noise: $392.21\mu\text{Vrms}$
Crosstalk: $\geq 65\text{dB}$
THD & Niose: $< 0.03\%$
Input Level: 2.2Vpp
Output Level: 45Vpp
RMS Power: $2 \times 30\text{W}$ ($4\Omega, 12\text{V}, 1\text{KHz}, 1\% \text{THD}$)
MAX Power: $2 \times 50\text{W}$ ($4\Omega, 12\text{V}, 1\text{KHz}, 10\% \text{THD}$)
Aux Input/Output Sensitivity(RCA): 1:22
Frequency Response: $20\text{Hz} \sim 20\text{KHz}$
System Sampling rate: $f_s = 600\text{kHz}$
Input Impedance: $12\text{K}\Omega$
Working Voltage: $\text{DC}12\text{V} \pm 2\text{V}$ (Boost to 28V)
The Static Current: $\leq 60\text{mA}$
Standby Power: $\leq 30\text{mA}$
Boot time: $\leq 2\text{S}$
Size of The board(W*H*L): $190\text{mm} \times 99\text{mm} \times 30\text{mm}$
Input Signal: 2 Channel RCA Audio Source
Output Signal: 2 Channel RCA Audio Source
Signal Gain Of The Output Channel: $-30\text{dbm} \sim 30\text{dbm}$
Output Phase: Positive phase
Output Delay: 20ms

Description

AP100 makes car speakers demonstration easy, it supports up to dual channel output at 4Ωx 50Watts, which is sufficient for most of the retail audio demonstration displays. It employs premium acoustic-pro components for stable power output capability and sound clarity. For extra flexibility, it can drive most of the high power car speakers with output power settings. With THD & noise level as low as <0.03% & S/N ≥100dB, we are proud of its high performance to work as the alternative to ANY branded power amplifiers.
